

About the Seminar

Climate change is a global phenomenon is no more a myth but a reality. Climatic Change is dedicated to the totality of the problem of climatic variability and change - its descriptions, causes, implications and interactions among these. The effect of climate change is different; it affects the environment and also the economy which is closely related to the environment. The purpose of the conference is to provide a means of exchange among those working in different disciplines on problems related to climatic variations. It may act as dissemination point to understand the current state of affair of the country and suggest the government how and what kind of effective measures to be taken for the conservation of both economy and environment. This means that the participants have an opportunity to communicate the essence of their studies to people as well as to report to the stake holders about the existing scenarios.

Perspective Themes

- ☞ Disaster management and Risk Reduction: Sendai Frame work.
- ☞ Climate Change- Resilience Mechanisms in India.
- ☞ Climate Change – Kerala Perspective- Perspectives from People, Earth and Economics.
- ☞ State Society and Climate Change.
- ☞ Climate change and ICT in India.
- ☞ Sector Specific Vulnerabilities.
- ☞ Climate change and Ecosystem responses.
